NEW MORNING SCHOOL

# Me and My Shadow

## Fruits and Vegetables

Growing up, the phrase “always eat your vegetables” followed us throughout the years. During our “Fruits and Vegetables” segment of Me and My Shadow, the children will learn the importance of eating healthy and sing, dance, and participate in activities relating to our theme.

We will discuss the different kinds of vegetables and fruits of the fall, such as pumpkins, gourds, corn, apples, raspberries and different squashes. We will learn about how they grow, where they grow, and of course, how great they taste!

Another phrase that we all remember is, “don’t play with your food!” However, here at school, we will stamp, paint and turn our vegetables and fruits into magnificent characters and works of art. And on the last day, we will turn the fruits and vegetables that we learned about into a giant friendship salad!

### Instructor

### Venee Yatooma

Venee Yatooma graduated from Oakland University with a bachelor’s in psychology. She works in the early childhood program at New Morning School, having worked with children from preschool through grade eight. She teaches our summer preschool Discovery Days and is planning a dynamic Me and My Shadow program to thrill our youngest set.
